JavaScript / Node.js

- PHP · HTML / CSS
- C# · C++ · SQL
- Python · REST APIs

TypeScript

React / Next.js

Artificial Intelligence

- Relational databases
- GitHub / Git

Spanish — native
English — advanced

Full time
Immediate start

PROFESSIONAL PROFILE

Full stack web developer focused on JavaScript, TypeScript, and React. I'm known for my attention to detail — I don't like loose ends or delivering something that isn't complete and well-built. I use Artificial Intelligence as an active work tool and learn by deliberately breaking things to understand how they really work. I'm looking for an environment where I can contribute real value and keep growing alongside the organization.

PERSONAL PROJECTS

Management System — Tennis Academy

2026

- › Full stack web app for a tennis academy: video library, player profiles, training planning, and subjective wellness tracking.
- › Three access roles (Admin, Staff, Player) with route protection, RBAC, and server-side validation on every mutation.
- › REST API consumption for module integration and data management.
- › Stack: Next.js, React, TypeScript, Supabase (Postgres + Auth + Storage), Tailwind CSS, Vercel.

Management System — Retail

2026

- › Management system for small shops (convenience stores, grocery stores): replaces paper notebooks for sales, supplier invoices, and cash register reconciliation.
- › AI-powered invoice scanning (vision): extracts data and matches it against the existing product catalog.
- › Closed-shift records are immutable — same principle as a verified physical cash count.
- › Stack: Next.js, React, TypeScript, Supabase, Claude API (vision), Tailwind CSS.

LubriBox Car Service — Website

2026

- › Full stack website for an auto shop: vehicle-based service price lookup and online appointment booking via WhatsApp.
- › Admin panel with CRUD for services and categories, persisted in Vercel Blob.
- › Catalog of 200+ models from 17 brands with verified oil capacities for the Argentine market.
- › Stack: Next.js, React, TypeScript, Tailwind CSS, Vercel Blob, iron-session.

ChatPDF — Chat with documents

2026

- › Web app that lets users upload a PDF and ask questions about its content in natural language.
- › Client-side text extraction with pdfjs-dist — the file is never uploaded to any server.
- › Stack: Next.js, React, TypeScript, Tailwind CSS, Anthropic SDK (claude-sonnet-4-6).

WORK EXPERIENCE

Administrative Internship

2018 – 2019

Banco Macro

- › Check processing and validation with handling of sensitive financial information.
- › Customer service; account opening and closing under regulatory procedures.
- › Review and analysis of operational area reports.

Ref.: Silvia Rita Tejeda — (3564) 514922

Sales Associate / Store Clerk

2016 – 2017

Burbuja's

- › Customer service, sales, and merchandise organization.

EDUCATION

Programming Technician

Degree obtained UTN — Universidad Tecnológica Nacional

High School Diploma — Social Sciences

2013 – 2018 Instituto San Francisco de Asís

Advanced English

2012 – 2018 Saint John the Baptist
