PROFESSIONAL PROFILE

Programming Technician (UTN) who has built and deployed full stack web applications that replaced manual workflows and delivered measurable results for real users. Designed a role-based access system serving 5 active users that eliminated WhatsApp-based coordination, centralized class video libraries, and streamlined tournament scheduling. Developed REST APIs, authentication systems, and database-driven solutions using Java, Spring Boot, Node.js, SQL, MongoDB, and AWS. Advanced English (B2+). Thrives in collaborative, global environments with a strong commitment to clean code and continuous improvement.

PERSONAL PROJECTS

- Management System — Tennis Academy**2024 – Present
- Replaced a WhatsApp-based coordination system for 5 teachers with a structured web platform, eliminating communication gaps.
 - Designed independent role-based dashboards (RBAC) that centralized class videos, player profiles, and tournament calendars in one place.
 - Built and consumed REST APIs to integrate all modules, reducing manual data entry across the platform.
 - Stack: JavaScript, Node.js, Supabase, user authentication, GitHub, Vercel.
- AI-Powered Chatbot**2026
- Conversational assistant integrating Large Language Models via REST API, with a fully custom web interface.
- Personal Finance Management App**2026
- Income and expense tracking with categorization and transaction reporting.
- Institutional Website — Optical Store (Freelance)**2026
- Service catalog and contact form for a real freelance client, fully designed and deployed.
- Workers' Compensation Calculator — Law Firm**2024
- Web-based indemnity calculation tool built on current labor legislation.
